SUPPLEMENT TO

REPORT NO.

THIS IS UNEVALUATED INFORMATION FOR THE RESEARCH USE OF TRAINED INTELLIGENCE ANALYSTS

25X1 25X1

- 1. MAVAG is producing parts, particularly ignition magnetos for automobiles and tractors. They are being produced in increasing quantities for delivery to the Soviet Union. These parts were not manufactured in Hungary until recently when Soviet orders impelled MAVAG to begin producing them.
- 2. As a result of experiments made in Hurgary and the Soviet Union in 1947, MAVAG undertook to produce ignition magneto. Seventy-five percent of this production, which was begun in early 1948, is for delivery to Soviet Russia. The capacity of these ignition magnetos is similar to that of the Bosch Ign type. Technical

axle height

45 mm.

overall height

183 mm.

length

212 mm.

weight

5.6 kgr.

Only the ball bearings and tungster parts must be imported from abroad. These magnetos may be used for all types of vehicles (trucks, tractors, etc.).

3. As a result of Soviet orders, MAVAG is also manufacturing other auto-electrical parts such as dynamos and the Zerstreaber (type 35/E) carburetor.
